

# 2023 PROJECT OF THE YEAR

Environmental

\$25M to less than \$75M

**AGENCY:** *PBOT*

**CONTRACTOR:** *Landis & Landis LLC*

**CONSULTANT:** *Hererra Environmental Consultants*

## SW Capitol Highway— Multnomah Village to West Portland

This project was a reconstruction of a 0.9-mile substandard arterial street that included 7,000 linear feet of stormwater pipe to four new regional basins and upgrading a half mile of water main to larger, seismically resilient pipe. Uniquely, traditionally siloed bureaus—PBOT, BES, and PWB— came together and pooled their resources to design and construct a single, cohesive corridor project. Over 600 trees and over 2,800 shrubs were planted for this project.
