

Elizabeth Eastlick

George Fox University Civil Engineering Scholarship

I am a full time Civil Engineering student at George Fox University, in Newberg, Oregon. I am a senior with a cumulative GPA of 3.9.

After gaining experience in the industry, and earning my Professional Engineering certification, I plan to work in either water resources or structural design.

Once I have achieved industry experience, I plan to work as an educator, at either the high school or university level. I have worked for a local firm in Yreka, California, for several years, and I plan to return there after graduating.
