

James Johaneck

Clackamas Community College Civil Engineering/ Drinking Water/ GIS Scholarship

I am a full-time student in the Water and Environmental (WET) Program at Clackamas Community College with a cumulative GPA of 3.67.

I completed an internship with the City of Scappoose Water Treatment Plant over the summer, gaining real-world experience in a municipal water treatment setting. The WET Program combines my interest in natural resources with my love of science.

I am working toward my Associate of Applied Science, with graduation expected at the end of spring term 2024.
